Engoo Material Selection – Design Brief

Design Challenge

The core challenge is to redesign Engoo's material selection process to better serve students during lesson booking. Currently, the 'Materials' module functions in isolation from booking flows, tutor matching, and subscription guidance. This creates a fragmented, cognitively heavy experience that alienates Engoo's core user base intermediate-level, time-constrained working professionals. The UX needs to be reframed to present the right material at the right time, with clarity, context, and connection to Engoo's wider infrastructure.

Requirements

- Access Clarity: Students must be able to instantly identify which materials are available under their current subscription.
- Tutor-Material Matching: Recommend tutors who are aligned with a selected material (e.g. Business English).
- Progressive Disclosure: Preview materials (e.g. goals, example dialogue) to reduce cognitive load.
- Interface Unification: Bridge the gap between 'Materials' and 'Booking' pages.
- Upgrade Nudging: Embed tasteful, non-invasive calls-to-action for locked content.

All changes must work within Engoo's content and subscription system, and be intuitive for intermediate English users, with a mobile-first, culturally sensitive design.

Timeline (Assignment 2)

Aug 7 – Aug 21:
- Wireframes of restructured material flow
- Moodboards inspired by Japanese minimalism and Engoo UI
- Card sorting for filter/content logic

Aug 22 – Sept 10:
- Think-aloud testing
- Tree testing and first-click tests

Sept 11 – Oct 1:
- High-fidelity prototype
- A/B testing, expert heuristic review
- Accessibility testing and final refinement

Submission Deadline: October 2, 2025
